

Testimonial - Multi Purpose Store

Specialist Installations Division

Professionalism, value for money, reliability and the attitude that nothing is too much trouble. These are the words used when describing Jeremy Nunn and Thurlow Nunn Standen's Specialist Installations Division.

Dean Bowd, of Bowd Farming Company Ltd, sums it up with: "He knows his stuff, and that is what ultimately won the contract."

The TNS Specialist Installations Division (SID) won the contract to build and equip the multi purpose store at Saracen's Head in Lincolnshire for Bowd Farming Company.

The Company are tenants of the Crown Estate and in October 2010 the business almost doubled in size highlighting the need for a purpose built store to cope with the increase in production.

The end result is a 1000T insulated bulk store with high capacity fans selected for grain drying and potato cooling, hardwood drive on floor, high level air mixing box with automatic louvres and temperature control for

long term storage of potatoes.

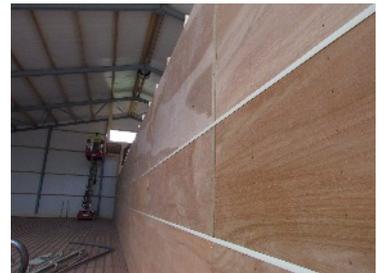

The store is in two halves with a further phase of development for PV solar panels fitted to the south facing roof to provide 'green' energy.

Talks about the work started in November 2010 but it wasn't until May 2011 that planning permission was granted, instructions given by Carter Jonas, the landlords agents, with work starting on site in August 2011. Alan Giles, Managing Partner with AMG Farm Business Consultancy added: "Jeremy, Dean and I all worked very closely on the planning permission, and store design which is to a very high standard.

Delays in the granting of permission related to considerations for nearby residential property and the requirement of a decibel

level of just 35dbA, which SID have achieved with sophisticated attenuation equipment.

"The first harvest the store will provide bulk storage but future plans are envisaged for this to alter to storage of 1T boxes, which has been incorporated into the design"

Alan explains: "Originally the work went out to three tenders but Jeremy won the contract with his strong knowledge base and professional attitude. With the ground breaking taking place as late as August and completion in October, this only strengthens our belief that we chose the right company to do the job."

Dean adds: "We had high expectations of Jeremy and SID and I'm pleased to say these have been far exceeded."
